HANGING WEIGHT CO. · HANDOFF PACKET · OCTOBER 30, 2026

YOUR WEBSITE, YOUR BOARD AND YOUR 20 AGENTS

Everything we built for you, how it works, and exactly how to take it over. Prepared for Allen by Startup Agile.

Start with the 6-minute walkthrough video, then read pages 2 and 3. That's all you need for day one. The rest is here when you need it.

PAGE 2

WHAT'S IN THIS PACKET

1. **What you got**: everything in the $2,000 build, in one list
2. **Your first week**: the 5 things to do, in order
3. **Your website**: home page, calculator, $197 booking, thank-you page
4. **Your owner's board**: every screen and what it's for
5. **Your 20 agents**: what each one does and when it runs
6. **Turn on your agents**: the prompt to paste into your Claude
7. **Your daily 10 minutes**
8. **Taking it over**: what you own, where it lives, who holds the keys
9. **Going live**: steps for you or your website person
10. **Before you go live**: things only you can confirm
11. **Questions you might have**

1. What you got

PIECE	WHAT IT IS
New website	A home page that sells your three offers, with one promise up top: *Know your price. Sell out your beef.* It has the full Ranch Store in a Box breakdown, questions ranchers ask, and your policies.
Beef Price Calculator, version 2	A rancher puts in his head count and costs and gets his break-even and three prices (floor, fair, premium) per pound of hanging weight. He can print a price sheet, check it against the sale barn, or leave his email to get his plan.
$197 booking flow	Three short steps: phone or video, up to 3 times that work for him, then his details. Then he pays on your Stripe and lands on a "You're booked" page.
$2,000 interest form	"Tell Allen you're interested": name, phone, email, head count. It doesn't take payment until you decide to (section 9).
Owner's board	Your private dashboard, built for your phone. It shows visits, calculator use, emails, bookings, $2,000 interest, money, traffic, growth and website checks, plus your 20 agents. It connects to your Gmail and Google Calendar so you can answer ranchers and confirm or move call times from one place.
20 agents	Written instructions for 20 scheduled tasks that run in **your own** Claude account. They find ranchers, write invitations and follow-ups, prep you for calls, write your posts, look after $2,000 clients and watch your websites. They only write drafts; you press Send.
Setup prompt	One message you paste into Claude, and it sets your agents up for you (section 6).

Walkthrough video and this packet	So you, or anyone you hire, can run it without us.
All the code	Website: `github.com/Calfbandit/hanging-weight-co` (already in your GitHub). Board: `hanging-weight-board`, which moves to your GitHub (section 8).

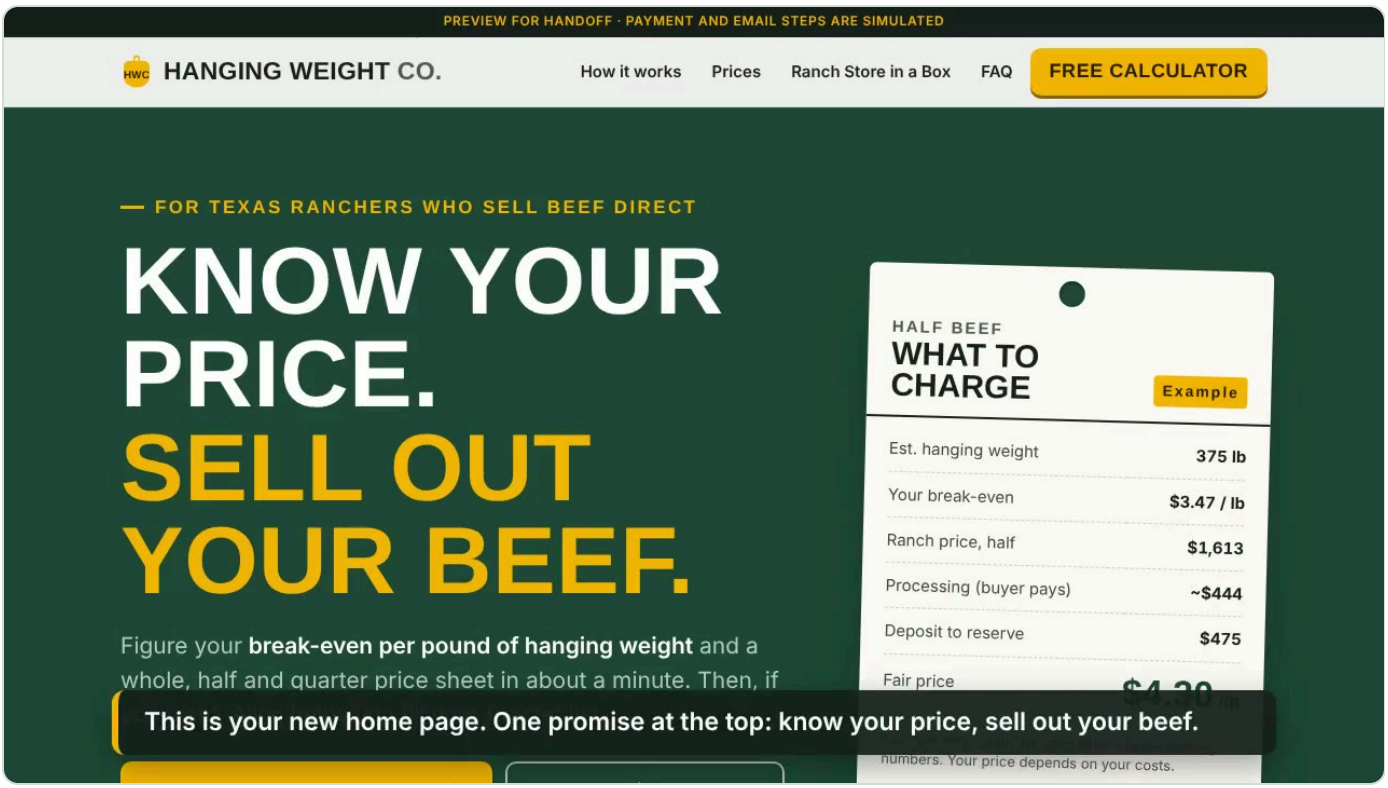

2. Your first week

1. **Watch the walkthrough video** (6 minutes).
2. **Click through the previews** on the handoff page: the website and the board. Nothing you click there is real or charges anyone.
3. **Read section 10** and send DJ your answers: the $2,000 package list, your short bio and photo, and your refund terms. Those are the only blanks left on the website.
4. **Turn on your agents**: paste the setup prompt (section 6) into Claude. Start with 6. About 30 minutes, once.
5. **Hand section 9 to whoever runs your website** when you're ready to go live.

SECTION 3

YOUR WEBSITE

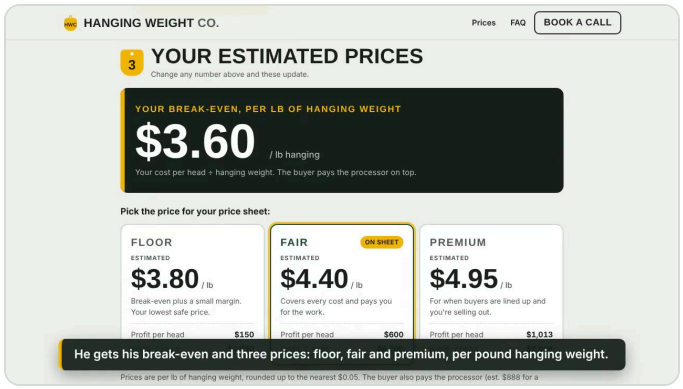

Four pages, one job: turn a rancher who's curious about his price into a $197 call, and some of those into a $2,000 client.

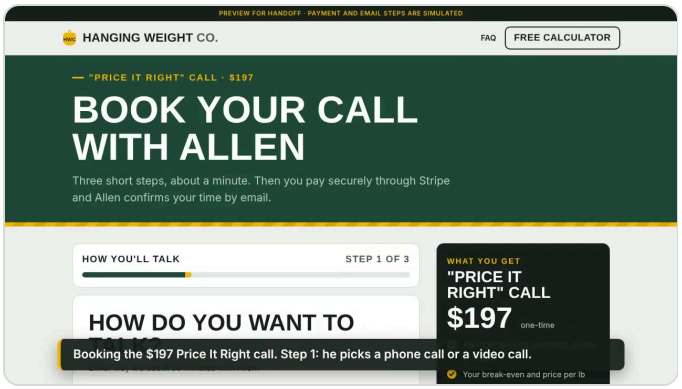

Home page: the promise, the three offers and a sample price tag.

Home page

- The top says what you do and has one big button: **Price my beef, free**.
- The three offers sit side by side: free calculator, $197 Price It Right call, $2,000 Ranch Store in a Box.
- **Everything in the box**: the $2,000 package as two halves ("Allen's part" and "Done for you"), a 90-day timeline, and how they pay ($1,000 to start, $1,000 after kickoff, and the $197 is credited if they upgrade within 30 days).
- **About Allen** (still needs your photo and bio), questions ranchers ask, contact email, and payment, privacy and refund policies.

Calculator results: break-even and three prices.

Booking a $197 call: phone or video.

Calculator (hangingweightco.com/calculator)

1. **His herd:** head count, how he sells (whole, half, quarter), zip code.
2. **His costs per head:** calf, feed, pasture, hauling, vet, marketing, kill fee, cut-and-wrap per pound, hanging weight. Filled with typical Texas numbers he can change.
3. **His prices:** break-even per pound hanging, then floor, fair and premium. He can add a sale barn price to compare, print a one-page price sheet, copy it as text, or leave his email to get his plan.

$197 booking (hangingweightco.com/book)

1. Phone call or video call.
2. Up to 3 times that suit him.
3. Name, email, phone, ranch, head count and how he sells. If he used the calculator, his numbers come along.
4. He pays $197 on your existing Stripe link, then lands on **You're booked**. You confirm a time from your board, and it goes on your Google Calendar with an invite (and a Google Meet link for video).

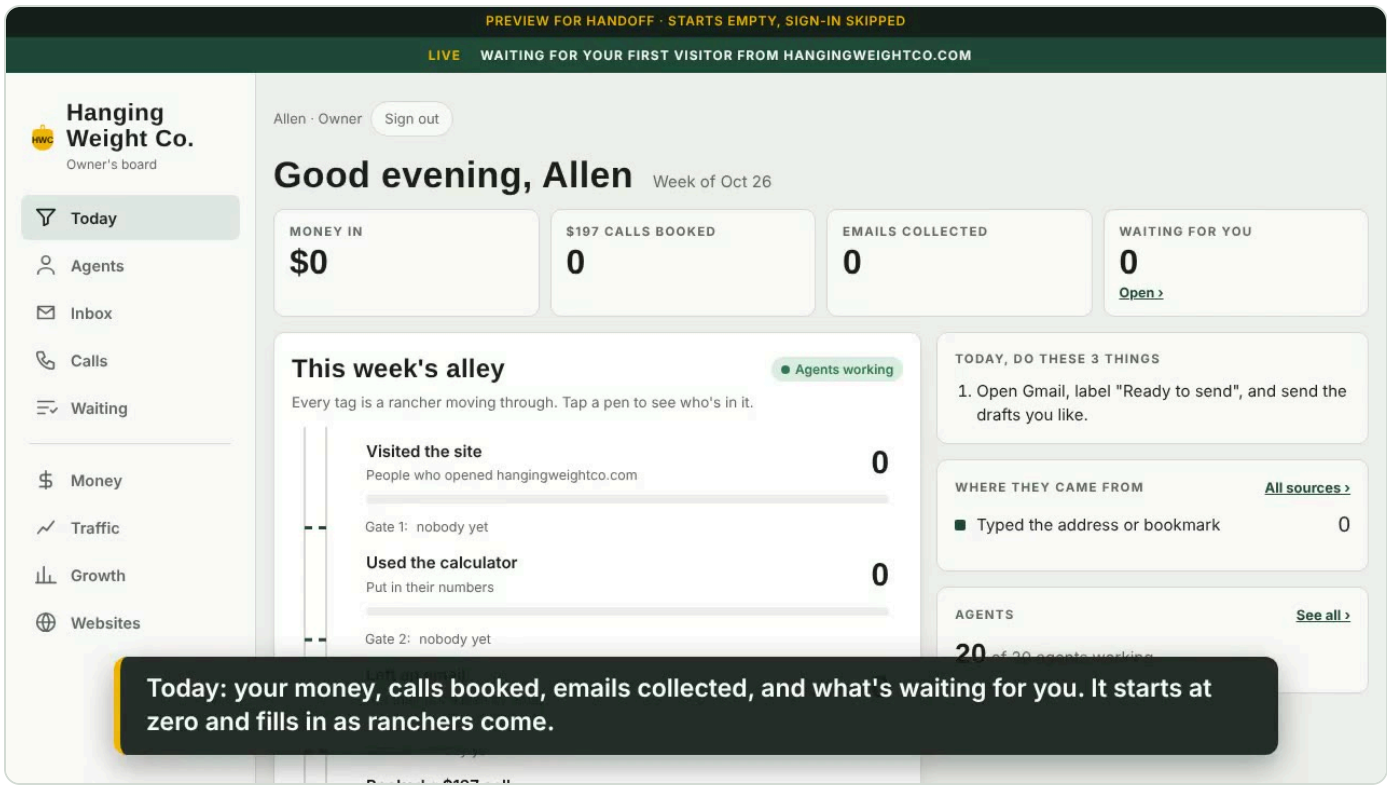

What gets tracked

Each visit, calculator use, email left, booking, payment and $2,000 interest is sent to your board and to Mixpanel (project "Herd Direct"). No card numbers ever touch the website. Stripe handles payment.

SECTION 4

YOUR OWNER'S BOARD

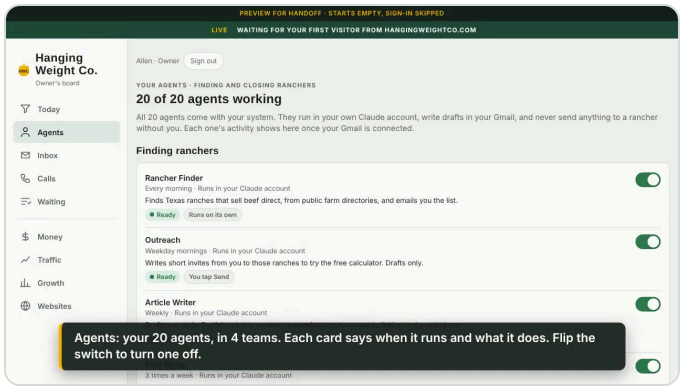

Private. Only people with a username and password get in. Made for your phone: add it to your home screen.

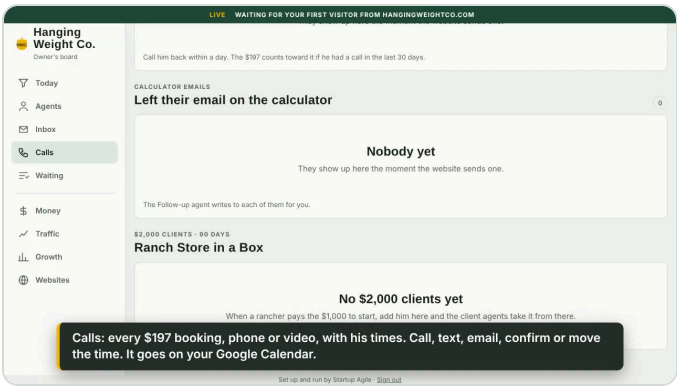

Today. It starts at zero and fills in as ranchers come in.

SCREEN	WHAT IT SHOWS YOU
Today	Money in, $197 calls booked, emails collected, what's waiting for you. **The alley** shows every rancher moving from visit → calculator → email → $197 call → $2,000 package, and where they stop. Plus 3 things to do today.
Agents	All 20 agents in 4 teams: when each runs, what it does, its latest email to you once Gmail is connected, and an on/off switch.
Inbox	Connect Gmail once. Then read and answer ranchers who booked or left an email, without leaving the board. It only opens those ranchers' emails, nothing else in your inbox.
Calls	Every $197 booking, phone or video, with his picked times. Buttons to Call, Text, Email, and Confirm or Move the time, which puts it on your Google Calendar and emails him the invite. Below: who asked about the $2,000 package and who left an email on the calculator.
Waiting	Drafts your agents wrote for you to read and send.
Money	$197 calls this week and the last 8 weeks. Your Stripe always has the final word.

Traffic	Where ranchers came from (Facebook, Google, outreach emails, typed it in) and which source turns into calls.
Growth	The last 8 weeks, week by week.
Websites	Your sites, and the Watchdog agent's checks every 6 hours.

Agents: all 20, with on/off switches.

Calls: bookings, $2,000 interest and calculator emails.

SECTION 5

YOUR 20 AGENTS

They live in your own Claude account and read your own Gmail. They write; you decide. Nothing goes to a rancher, buyer or business until you press Send.

Finding ranchers

#	AGENT	WHAT IT DOES FOR YOU	WHEN (CENTRAL)
1	**Rancher Finder** START HERE	Finds 15–20 new Texas ranches that sell beef direct, from public business listings, and emails you the list.	Every morning, 5:10
2	**Outreach** START HERE	Writes up to 10 short, friendly invitations from you to those ranches, pointing them to your free calculator.	Weekday mornings, 6:20
7	**Article Writer**	Writes one plain-English article that answers a question ranchers search for (like "how do I price a half beef?") and emails you the draft. Never publishes.	Tuesdays, 5:30
8	**Post Writer**	Writes a short "price check" or pricing tip for your own Facebook page and emails it to you to copy and post yourself.	Mon, Wed, Fri, 5:40
9	**Partner Outreach**	Finds processors, feed stores, sale barns and extension offices and writes up to 5 notes offering free calculator flyers for their counter.	Wednesdays, 6:00
10	**Referral**	The morning after each $197 call, writes a thank-you that asks the rancher to pass your calculator to a neighbor.	Every morning, 7:10

Turning visitors into calls

#	AGENT	WHAT IT DOES FOR YOU	WHEN (CENTRAL)
3	**Follow-Up** START HERE	Writes the thank-you and follow-up emails for people who used the calculator, and a "you're booked" email for $197 calls.	Every morning, 6:40
11	**Calculator Questions**	When a rancher writes back with a pricing question, writes your answer and re-runs his own numbers the way the calculator does.	Every morning, 6:50
12	**Booking**	For each $197 booking, writes the confirmation with a time, the reminder the day before, the video link on the day, and replies if someone needs to move.	Every morning, 6:30
4	**Call Prep** START HERE	Emails you a one-page cheat sheet before each $197 call: who they are, their numbers, 3 questions, when to mention the $2,000 package.	Every morning, 7:00

13	**Call Recap**	Turns your call notes into the rancher's written plan: his price sheet, a plan for his next 5 beef, what to say to buyers, 3 posts.	Every morning, 6:10
14	**Upgrade**	5 to 25 days after a call, writes ONE friendly note about the Ranch Store in a Box before his $197 credit runs out.	Every morning, 7:20

Taking care of $2,000 clients

#	AGENT	WHAT IT DOES FOR YOU	WHEN (CENTRAL)
15	**HerdDirect Profile Builder**	When a client starts, writes his HerdDirect storefront from his own words, plus a list of photos to get from him, and emails it to you.	Every morning, 5:50 (or click Run now)
16	**Local Buyer Finder**	Finds churches, gyms, offices, booster clubs and co-ops near each client and writes up to 10 group-buy invitations to his HerdDirect page.	Thursdays, 5:20
17	**Client Post Writer**	Writes that week's post for each client, with his HerdDirect link, and emails them to you to approve.	Mondays, 5:30
18	**Order Reminders**	Writes the right note to each buyer: deposit received, send your cut sheet, balance due, pickup day.	Every morning, 6:05
19	**Client Report**	On day 30, 60 and 90 of each client, emails you a one-page report from what's in your Gmail.	Checks every morning, 7:15

Keeping watch

#	AGENT	WHAT IT DOES FOR YOU	WHEN (CENTRAL)
5	**Website Watchdog** START HERE	Checks your websites. Emails you only if something breaks.	Every 6 hours
20	**Weekly Numbers**	Last week's numbers next to the week before (leads, bookings, payments, package starts, emails sent), plus one suggestion.	Mondays, 7:00
6	**Daily Driver** START HERE	One short morning email: what came in yesterday and the 3 things to do today.	Every morning, 7:30

Rules every agent follows

- Never email anyone but you. They only save drafts for ranchers, buyers and businesses, under the Gmail label **Ready to send**.
- Never make anything up: no made-up ranches, numbers, reviews, stories or promises. No health or grass-fed claims.
- Never use Facebook, Instagram, LinkedIn, TikTok or any social media. They only use public business listings and websites.
- Only collect business contact details a ranch publishes itself.
- Anyone who says "no thanks" never hears from you again.
- They write like you: plain and friendly, rancher to rancher. They never mention software.

SECTION 6

TURN ON YOUR AGENTS

You paste one message into Claude, and Claude sets them up for you. About 30 minutes, once.

Before you start

- A paid Claude plan that includes **scheduled tasks** (claude.ai, on your computer).
- The Google account that receives **theherd@herddirect.net** mail and your Stripe receipts. If that address isn't a Gmail or Google inbox, have it forwarded into a Gmail you use first.
- Your business mailing address (it goes at the bottom of every invitation, as the law requires).

Steps

1. Open **claude.ai** on your computer and sign in.
2. Connect Gmail: click your name (bottom left) → **Settings** → **Connectors** → **Gmail** → **Connect** → pick your Google account → **Allow**. Do the same for Google Calendar if you use it.
3. Start a new chat. Copy the whole message below, paste it in and press Enter.
4. Answer its one question (your mailing address) and follow along. When it's done, it sends you a test morning email.

Buttons may be named a little differently by the time you read this. If Claude can't create scheduled tasks from the chat, the message tells it to walk you through each one by hand. The full instructions for every agent are also in `handover/helpers/` in your website's GitHub, with a page per agent.

The setup prompt: copy everything in the box

```
I'm Allen. I run Hanging Weight Co. (hangingweightco.com), a free beef price calculator for Texas
ranchers, a $197 "Price It Right" call (by phone or video), and a $2,000 "Ranch Store in a Box"
package. My business email is theherd@herddirect.net.

I have 20 helper agents written for me. Each one is a scheduled task that runs in my Claude
account, reads my Gmail and writes drafts for me. I'm not technical, so please do the setup for me
and keep everything in plain English.

The instructions for each agent are public on GitHub, one file per agent:
https://github.com/Calfbandit/hanging-weight-co/tree/main/handover/helpers
The raw text of each file is at:
https://raw.githubusercontent.com/Calfbandit/hanging-weight-co/main/handover/helpers/<file name>
Start by reading README.md there.

Please do this, in order:

1. Check that my Gmail is connected to Claude. If it isn't, stop and tell me exactly where to
click to connect it (I'll use the Google account that gets theherd@herddirect.net mail and my
Stripe receipts). If I use Google Calendar for calls, help me connect that too.

2. Ask me ONE question before you start: my business mailing address. (Outreach, Follow-Up,
Partner Outreach, Upgrade and Local Buyer Finder put it at the bottom of every invitation, as the
```

```
law requires.) Don't make one up.

3. Create these 6 agents first, as scheduled tasks, one at a time:
   - Rancher Finder (rancher-finder.md)
   - Outreach (outreach.md)
   - Follow-Up (follow-up.md)
   - Call Prep (call-prep.md)
   - Website Watchdog (watchdog.md)
   - Daily Driver (daily-driver.md)
   For each one:
   - Read the file. The task's instructions are EVERYTHING below the line that says "Copy
everything below this line into the scheduled task". Use that text word for word. Don't shorten
it, rewrite it or "improve" it.
   - Replace [Your mailing address] with the address I gave you, if it's in there.
   - Name the task exactly the agent's name.
   - Use the schedule the file gives under "When it runs" (the schedule code in backticks), in the
America/Chicago (Central) time zone.
   - Give it Gmail, plus Web search if the file says it needs it, plus Google Calendar for
Booking, Call Prep and Daily Driver if I connected it.
   - If the file has a "Before you save it" part, tell me what it says in one or two plain
sentences.

4. When the 6 are done, show me a short table: agent, when it runs, what it does. Then run Daily
Driver once right now so I can see the morning email arrive in my inbox.

5. Then ask me if I want the next group. The order is:
   - Turning visitors into calls: Calculator Questions, Booking, Call Recap, Upgrade, Referral
   - Getting the word out: Article Writer, Post Writer, Partner Outreach, Weekly Numbers
   - Only when my first $2,000 client starts: HerdDirect Profile Builder, Local Buyer Finder,
Client Post Writer, Order Reminders, Client Report
   Set each group up the same way as step 3.

Rules you must keep, now and later:
- The agents never send anything to a rancher, buyer or business. They only write Gmail drafts
(under the label "Ready to send") and send emails to me alone.
- Never make up ranches, people, numbers, reviews, stories, prices or health claims.
- Never use Facebook, Instagram, LinkedIn, TikTok or any social media.
- Don't change prices, my Stripe links or my policies.
- If you can't create scheduled tasks from this chat, tell me plainly and walk me through creating
each one by hand: where to click, what to paste, what schedule to pick.
- If something doesn't work, tell me what happened in one sentence and what I should do. Don't
guess.
```

SECTION 7

YOUR DAILY 10 MINUTES

1. **Read the morning email** ("Good morning – your day at Hanging Weight Co."). It tells you the 3 things to do.
2. **Open Gmail → label "Ready to send"** (or Drafts). Read each one. If a draft starts with **"ALLEN:"**, do what that line says and delete the line. Edit anything. Send the good ones, delete the rest.
3. **Before each $197 call**, read the "Call prep" email for that rancher.
4. **After each call**, email yourself your notes with the subject **Call notes – rancher's name**. Call Recap turns them into his written plan as a draft.
5. **"Website alert"** email? Do what it says. If it says urgent, call your website person that day.

Once a week you also get an article draft, three Facebook post drafts (you post them yourself) and your Monday numbers.

SECTION 8

TAKING IT OVER

What you own, where it lives, and who holds the keys.

THING	WHERE IT LIVES	WHO CONTROLS IT
Website code	`github.com/Calfbandit/hanging-weight-co`	You (your Calfbandit GitHub)
Board code	`hanging-weight-board`, moving from Startup Agile's GitHub to yours	You, once DJ transfers it
Agents	Your Claude account; instructions in `handover/helpers/`	You
Domain hangingweightco.com	Wherever you bought it (your registrar)	You
Payments	Your Stripe: the $197 link ending `…7L6Zy01`	You
Email	theherd@herddirect.net / your Gmail	You
Analytics	Mixpanel project "Herd Direct" (site = hanging_weight)	You

Passwords and keys

None are written in the code or in this packet, and none should ever be. Your board password comes separately, never by email. Change it the first time you sign in. Server keys (Google sign-in, email sending, Stripe webhook) go only in the server's private settings file, never in GitHub.

SECTION 9

GOING LIVE

Hand this section to your website person. Detailed click-by-click steps are in `docs/GO-LIVE.md` (website) and the board's `README.md`.

A. The website (about 30 minutes, then a wait)

1. **GitHub Pages:** repo → Settings → Pages → Deploy from a branch → `main` / root → Save. Custom domain `hangingweightco.com` (already in the CNAME file).
2. **Domain:** at your registrar, turn off the forward to the old Claude page. Add four A records for `@`: `185.199.108.153`, `185.199.109.153`, `185.199.110.153`, `185.199.111.153`. Add a CNAME for `www` pointing to `calfbandit.github.io`. When GitHub's check turns green, tick Enforce HTTPS.
3. **Stripe:** on the $197 Payment Link → Edit → After payment → redirect to `https://hangingweightco.com/book/thanks/`.
4. **Test:** on your phone, run the calculator, book a call, pay with a real card, land on "You're booked", then refund yourself.
5. **Undo:** if anything looks wrong, turn the old forward back on and the old page returns. Nothing is lost.

B. The board (about an hour for someone technical)

1. The board needs a small always-on Linux server (a basic cloud server is enough) with Caddy and Node. The board's `README.md` lists every piece: the sign-in service, the data collector, the Caddy settings and the Google setup.
2. Create your sign-in: `node auth/server.js set-password you@yourmail --role owner --must-change`. Nothing shows while you type the password.
3. Point the website at your board: in the website's four pages, the line `const HW_API = "…/api";` must hold your board's address. Today it says `https://hangingweight.startupagile.ai/api`.
4. Gmail and Calendar inside the board: a one-time Google Cloud setup (about 15 minutes), step by step in the board's README. Then you click **Inbox → Connect Gmail**.
5. Optional: email alerts for new bookings (SendGrid key) and an instant "Paid $197" from Stripe (webhook secret). Both go in `/etc/hw-board/api.env`, never in GitHub.

> **If the board isn't running yet, nothing is lost**
>
> The $197 booking still goes to Stripe, so you still get paid. The plan and $2,000 forms open the rancher's own email app with a message to theherd@herddirect.net, already filled in. Your agents work from your Gmail either way.

C. When you want to take the $2,000 online

Make a $1,000 Payment Link in Stripe (test it in Test mode first with card `4242 4242 4242 4242`). Paste it into `const PACKAGE_URL = "";` in the four pages. Until then, the button opens the interest form, on purpose.

SECTION 10

BEFORE YOU GO LIVE

These are yours to decide. We didn't make anything up, so these are marked as blanks on the site.

☐ **The $2,000 package list** on the home page ("Everything in the box"). We suggested it; you confirm it: the 4 coaching calls, the 90-day text line, the HerdDirect storefront, the free Google Business Profile and USDA Local Food Directory listing, the QR flyer, launch message, local group outreach, weekly posts for 90 days, order reminders, day 30/60/90 reports, and "5 new ranches a month".

☐ **Your photo and a short bio** in your own words, for "About Allen".

☐ **Refund terms** for the $1,000 start payment.

☐ **Your $197 Stripe link is live, not test.** When you open it, the top must not say "Test mode".

☐ **Your business mailing address** for the agents' invitations.

☐ **Pricing elsewhere:** Farm & Ranch Marketing says "no commission" and HerdDirect says a 1% platform fee. Pick one before the agents start pointing clients to HerdDirect.

☐ **Farm & Ranch Marketing:** the board lists it as retired, sending people to HerdDirect. Tell us if that's wrong.

SECTION 11

QUESTIONS YOU MIGHT HAVE

Will an agent ever email a rancher without me? No. They save drafts. The only emails they send are to you.

What does it cost to run? Your Claude plan, your Stripe fees, and a small server for the board if you host it. The website itself is free on GitHub Pages.

Can I turn an agent off? Yes: the switch on the Agents screen, or pause its scheduled task in Claude.

Something broke. What do I do? The Watchdog agent emails you what broke and what to try. Your website person can undo any change from GitHub, because every change is saved there.

Can someone else work on it? Yes. Everything is plain HTML and JavaScript with no special tools. Any web developer can pick it up from the two GitHub repos and this packet.

Where are the instructions if I lose this PDF? `docs/GO-LIVE.md` and `handover/helpers/README.md` in your website's GitHub.
